VHF BI & BIII TRANSMITTER

General information

The series TX01-203FL & TX03-203FL belongs to the High Power product family of TV Transmitter fully solid state technology, Liquid Cooled.

The family, available for the VHF Band, is designed for a wide range of TV broadcast standards. These include analogue TV standards (B/G, D/K, M/N, I), colour coding standards (SECAM, PAL, NTSC), (FM mono, IRT dual-sound/stereo and NICAM), digital TV standards (DVB-T, DVB-T2, ATSC).

The compact design of 3.0 kWpsync output power Module amplifiers allows the arrangement of up to 8 Modules in one 19 inches rack

Transmitter Model	BAND	Output Power Capability
